

ACADEMICISM

Meaning: Academicism refers to an adherence to traditional artistic or scholarly standards that emphasizes theoretical knowledge and formal techniques, often at the expense of emotional expression or practical application.

1. Academicism often prioritizes theoretical knowledge over practical application.
2. The artist's work was criticized for its overt academicism, lacking emotional depth.
3. In literature, academicism can sometimes stifle innovative voices in favor of established norms.
4. The debate around academicism in education centers on the balance between theory and hands-on experience.
5. Many believe that academicism can lead to a detachment from real-world issues.
6. Her thesis on the impact of academicism on modern art was both enlightening and thought-provoking.
7. Critics argue that academicism in film can result in overly complex narratives that alienate audiences.
8. The conference focused on the role of academicism in shaping contemporary philosophical discourse.
9. Despite its merits, some scholars argue that academicism can create elitism in intellectual circles.
10. The rise of digital learning environments challenges traditional academicism by promoting accessibility and interaction.
