

ACTINIC

Meaning: Actinic refers to the ability of light, particularly ultraviolet light, to cause chemical changes, especially in relation to its effects on biological tissues.

1. Actinic rays from the sun can cause significant skin damage if proper precautions are not taken.
2. The scientist conducted experiments to measure the actinic efficiency of different wavelengths of light.
3. A broad spectrum of actinic light can be beneficial for certain types of photosynthetic algae.
4. Exposure to actinic UV radiation may increase the risk of developing skin cancer over time.
5. The actinic properties of the new paint formulation were tested under various light conditions.
6. Actinic dermatitis is a condition that arises from prolonged exposure to ultraviolet light.
7. Farmers often monitor actinic radiation levels to optimize their crops' growth and health.
8. The laboratory used specialized filters to isolate actinic light for their research on plant responses.
9. Certain actinic compounds can enhance the performance of solar panels by improving light absorption.
10. Understanding actinic effects is crucial for developing better protective materials for outdoor workers.
