

ALUMINIC

Meaning: Aluminic refers to substances or compounds that contain aluminum, often used in industrial applications and coatings for their protective properties.

1. Aluminic compounds are often used in various industrial applications.
2. The aluminic coating on the metal provided excellent corrosion resistance.
3. Researchers are studying the properties of aluminic alloys for aerospace use.
4. Her expertise in aluminic materials made her a valuable asset to the team.
5. The aluminic finish gave the product a sleek and modern appearance.
6. They discovered that aluminic pigments could enhance the brightness of paints.
7. The engineer recommended an aluminic component to improve the structure's durability.
8. During the experiment, they noted the unique behaviors of aluminic mixtures.
9. Aluminic solutions are commonly used in chemical reactions to enhance efficiency.
10. The workshop focused on the innovative uses of aluminic substances in manufacturing.
