

ARROSION

Meaning: Arrosion refers to the process of erosion, particularly the gradual wearing away or removal of soil and rock from a surface, often caused by natural forces such as water or wind.

1. The arrosion of the riverbank has resulted in significant land loss.
2. Geologists study arrosion to understand its impact on landscape evolution.
3. The arrosion of metal surfaces can lead to structural failures in buildings.
4. Farmers are concerned about the arrosion of soil that affects crop yields.
5. Natural disasters often accelerate the arrosion of vulnerable coastal areas.
6. Mitigating arrosion is crucial for maintaining the integrity of historical monuments.
7. The arrosion process can be exacerbated by heavy rainfall and strong winds.
8. Environmentalists advocate for measures to prevent arrosion in protected areas.
9. Urban development can increase the risk of arrosion in nearby ecosystems.
10. The arrosion observed in the canyon walls reveals layers of geological history.
