

AUTOPNEUMATIC

Meaning: Autopneumatic refers to a system or technology that uses air pressure to automate functions, particularly in machinery or tire pressure management.

1. The engineer explained the benefits of the new autopneumatic system in the machinery.
2. Autopneumatic technologies are revolutionizing the way we think about tire pressure management.
3. She was fascinated by the autopneumatic mechanism that allowed the vehicle to adjust its suspension automatically.
4. For the project, we need to source autopneumatic components that can withstand high pressure.
5. The autopneumatic feature in the latest model ensures a smoother ride over uneven terrain.
6. He showcased an autopneumatic device that could inflate a tire in under a minute.
7. The use of autopneumatic systems in robotics has greatly improved efficiency and precision.
8. During the workshop, participants learned how to troubleshoot common autopneumatic issues.
9. The autopneumatic actuator responded quickly to changes in pressure, making it ideal for this application.
10. Innovations in autopneumatic design are making vehicles safer and more reliable on the road.
