

AZOTOUS

Meaning: Azotous refers to a type of nitrogen compound, particularly relating to nitrogen in a lower oxidation state, such as in azotous acid (HNO) and its derivatives.

1. The chemist carefully prepared a solution of azotous acid for the experiment.
2. Azotous compounds are often less stable than their oxidized counterparts.
3. In agriculture, azotous fertilizers can enhance soil nitrogen content.
4. The reaction produced azotous oxide, which was crucial for the study.
5. Azotous gases are typically less harmful than their nitrogen oxides.
6. Understanding azotous compounds is essential for environmental science.
7. The laboratory focused on synthesizing various azotous materials.
8. Azotous solutions must be handled with caution due to their reactive nature.
9. Researchers explored the properties of azotous forms in organic chemistry.
10. The book provided a comprehensive overview of azotous chemistry principles.
