

BICYCLIC

Meaning: BICYCLIC: relating to a chemical structure that consists of two interconnected rings.

1. The bicyclic structure of the compound contributed to its unique chemical properties.
2. Researchers are exploring bicyclic compounds for their potential in drug development.
3. The bicyclic nature of the molecule allows for efficient electron transfer.
4. In organic chemistry, bicyclic systems are often more stable than their monocyclic counterparts.
5. She created a bicyclic design for the new bicycle model, enhancing its aerodynamics.
6. The drug's efficacy was linked to its bicyclic framework, which improved receptor binding.
7. Bicyclic alkanes can be found in various natural substances, including essential oils.
8. During the lecture, the professor explained the significance of bicyclic compounds in synthetic chemistry.
9. The artist drew inspiration from bicyclic patterns in nature for her artwork.
10. Understanding bicyclic structures is essential for students studying advanced organic chemistry.
