

CARBAZOTIC

Meaning: Carbazotic refers to a class of chemical compounds derived from or related to carbazole, characterized by unique properties and potential applications in various scientific fields.

1. The researchers discovered that carbazotic compounds have unique properties.
2. In the laboratory, we synthesized a new carbazotic derivative for further testing.
3. Her presentation on the effects of carbazotic substances was well-received by the audience.
4. Carbazotic molecules exhibit interesting interactions with various enzymes.
5. The study revealed that carbazotic agents could potentially serve as therapeutic drugs.
6. He was fascinated by the structural complexity of the carbazotic compounds.
7. Carbazotic chemistry is a growing field with many unexplored avenues.
8. They published their findings on the environmental impact of carbazotic pollutants.
9. The team aims to develop a more efficient method for producing carbazotic intermediates.
10. Understanding carbazotic reactions can lead to advancements in material science.
