

# CENTRALIZATION

*Meaning: Centralization is the process of concentrating decision-making authority and control within a single central organization or leadership.*

1. The centralization of decision-making can lead to greater efficiency in large organizations.
2. Critics argue that centralization often stifles creativity and innovation among employees.
3. The government proposed a centralization of resources to better manage public services.
4. In many cases, centralization helps unify processes across different departments.
5. The company's shift toward centralization has resulted in a more streamlined operation.
6. Centralization might improve communication, but it can also create bottlenecks in workflow.
7. Some experts believe that excessive centralization undermines local autonomy and responsiveness.
8. The centralization of power in the hands of a few can lead to potential abuses.
9. Many industries are experiencing a trend toward centralization as they seek to reduce costs.
10. Centralization allows for a more consistent application of policies and procedures across the board.
