

CERIA

Meaning: Ceria is a compound of cerium oxide used as a catalyst in chemical reactions and as a glaze in ceramics.

1. Ceria is often used as a catalyst in various chemical reactions.
2. The bright ceria glaze on the pottery gave it a unique shine.
3. Researchers are exploring ceria's role in improving fuel cell efficiency.
4. Ceria nanoparticles have shown promise in environmental remediation.
5. The ceria-based material exhibited remarkable thermal stability.
6. Artisans value ceria for its vibrant color in glassmaking.
7. In recent studies, ceria has been identified as a key component in catalysts.
8. The ceria coating enhanced the durability of the metal surface.
9. Ceria is a rare earth oxide that has many industrial applications.
10. The innovative use of ceria in electronics is paving the way for new technologies.
