

CHEMIC

Meaning: Chemic: relating to the chemical properties or reactions of a substance.

1. The chemic properties of the substance were thoroughly analyzed in the lab.
2. She was fascinated by the chemic reactions that occurred during the experiment.
3. Understanding the chemic composition of the material is crucial for this project.
4. The chemic synthesis of the compound yielded unexpected results.
5. Researchers are exploring new chemic pathways to enhance drug efficacy.
6. His expertise in chemic engineering allowed him to solve complex issues.
7. The chemic balance in the solution was disrupted during the reaction.
8. She presented a paper on the latest advancements in chemic research.
9. The chemic interactions between the two elements were carefully monitored.
10. He has a deep passion for studying the chemic processes of life.
11. The chemic reaction produced a vibrant color change in the solution.
12. She had a keen interest in the chemic processes that occur in everyday life.
13. Understanding the chemic properties of the materials is essential for successful experimentation.
14. He documented the chemic analysis of the soil samples collected from the site.
15. The chemic formula revealed the composition of the unknown substance.
16. During the lecture, the professor explained the fundamental principles of chemic bonding.
17. Researchers are exploring new chemic compounds that could revolutionize medicine.
18. The chemic equation balanced perfectly, indicating a successful reaction.
19. Her fascination with chemic phenomena led her to pursue a career in environmental science.
20. The lab was filled with various chemic instruments used for analysis and experimentation.
