

CHIROLOGIST

Meaning: A chirologist is a practitioner who interprets the lines and features of the hands, particularly the palms, to analyze a person's character and predict their future.

1. The renowned chirologist was able to discern a person's character and past experiences simply by studying the lines on their palms.
2. During the Renaissance, a skilled chirologist was often consulted by nobility for insights into their future and personal destiny.
3. She consulted a chirologist not for predictions, but for a deeper understanding of her own innate tendencies and potential.
4. The book, written by a master chirologist, explained the intricate meanings behind the major and minor lines of the hand.
5. He approached palmistry with a scientific mindset, aiming to establish himself as a respected chirologist rather than a fortune-teller.
6. The chirologist pointed out the unique formation of my heart line, suggesting a deeply compassionate and emotional nature.
7. As a practicing chirologist for over forty years, she had analyzed the hands of thousands of individuals from all walks of life.
8. Modern chirologists often combine traditional palm reading with principles of psychology to offer more holistic life guidance.
9. The conference brought together chirologists from around the world to discuss new interpretations of palmar dermatoglyphics.
10. To become a certified chirologist, one must undergo extensive training in the complex symbolism of the hand's mounts, lines, and shapes.
