

CIRRO-STRATUS

Meaning: Cirro-stratus refers to a thin, ice-crystal cloud formation that often covers the sky and can create a halo effect around the sun or moon, typically indicating a change in weather.

1. The sky was covered in a thin layer of cirro-stratus, giving the sun a halo effect.
2. As the weather changed, cirro-stratus clouds rolled in, signaling an approaching storm.
3. Photographers often seek out cirro-stratus skies for their ethereal beauty during sunset.
4. The presence of cirro-stratus can indicate that rain is on the way within the next 24 hours.
5. She admired the delicate patterns of cirro-stratus clouds stretching across the blue sky.
