

CLITELLUS

Meaning: Clitellus: a thickened, glandular section of an earthworm's body that secretes a mucous sheath for reproduction and fertilization.

1. The clitellus plays a crucial role in the reproductive process of earthworms.
2. During copulation, the clitellus secretes a mucous sheath that helps in fertilization.
3. Scientists studying annelids often focus on the clitellus to understand their reproductive strategies.
4. Observing the clitellus can provide insights into the health and maturity of soil-dwelling species.
5. In some species, the clitellus can change color or texture during the breeding season.
