

CO-RELATION

Meaning: Co-relation refers to a statistical relationship or connection between two variables, indicating how changes in one may be associated with changes in the other.

1. The study revealed a strong co-relation between exercise frequency and overall mental health.
2. Researchers are investigating the co-relation between dietary habits and cardiovascular diseases.
3. There is a noticeable co-relation between education levels and income potential in urban areas.
4. The survey found a weak co-relation between social media usage and reported happiness levels.
5. Understanding the co-relation between different variables can enhance predictive modeling in research.
