

COAGULATED

Meaning: Coagulated refers to a process in which a liquid, such as blood or a protein solution, thickens and transforms into a semi-solid or solid state, often as a result of a chemical reaction or change in temperature.

1. The blood had coagulated quickly after the injury, forming a protective barrier.
2. In the laboratory, the scientist observed how the proteins coagulated when heated.
3. The cream had coagulated into a thick layer, making it perfect for the recipe.
4. After sitting out for too long, the milk had coagulated and developed an off-putting smell.
5. The chef explained that the key to a successful sauce was ensuring the fat and liquid had not coagulated prematurely.
