

CODEx

Meaning: A codex is an ancient manuscript in book form, often containing significant historical or cultural texts.

1. The ancient codex revealed insights into the culture and beliefs of a long-lost civilization.
2. Scholars meticulously studied the codex to decipher its complex illustrations and marginalia.
3. In the library's special collection, the rare codex was carefully preserved under glass to prevent deterioration.
4. The codex served as a crucial historical document, shedding light on the legal systems of the time.
5. Translating the codex required not only linguistic skill but also an understanding of the historical context in which it was written.
