

COMET

Meaning: A comet is a celestial body composed of ice, dust, and rocky material that, when passing close to the sun, develops a glowing coma and a tail due to solar radiation and wind.

1. The bright comet streaked across the night sky, leaving a shimmering tail in its wake.
2. Astronomers eagerly awaited the arrival of the comet, which was predicted to be visible to the naked eye.
3. Legends from ancient civilizations often depicted comets as omens or harbingers of significant events.
4. As the comet approached the inner solar system, its icy nucleus began to vaporize, creating a stunning display.
5. Many people gathered at the observatory to witness the rare celestial event and capture images of the comet.
