

CONATIVE

Meaning: Conative refers to the aspect of language or behavior that aims to influence or direct the actions and intentions of others.

1. The conative aspect of language often focuses on influencing the behavior of the listener.
2. In psychology, conative functions refer to the intention behind an action rather than the action itself.
3. Understanding the conative dimension of communication can enhance persuasive strategies in marketing.
4. The conative function of a speaker's words can significantly impact interpersonal relationships.
5. In linguistics, analyzing conative elements helps to interpret the speaker's intended effect on the audience.
