

CONDUCTIVE

Meaning: Conductive: capable of transmitting electricity or heat.

1. The material is highly conductive, making it an excellent choice for electrical applications.
2. In the lab, we tested various substances to determine which was most conductive at room temperature.
3. Copper wires are widely used in electronics due to their conductive properties.
4. The research focused on developing new conductive polymers for use in flexible electronics.
5. Heat travels more efficiently through conductive materials, which can improve energy transfer in systems.
