

CONJECTURER

Meaning: A conjecturer is a person who formulates or proposes theories or ideas based on incomplete information or speculation.

1. The conjecturer proposed a bold theory that challenged the established norms of science.
2. In the debate, the conjecturer presented several plausible ideas, sparking further discussion among the experts.
3. While some dismissed him as a mere conjecturer, his insights often proved to be ahead of their time.
4. The conjecturer's latest work delves into the mysteries of dark matter, raising more questions than answers.
5. As a seasoned conjecturer, she thrived on the thrill of exploring possibilities that others overlooked.
