

CONVEYER

Meaning: A conveyer is a mechanical device used to transport goods or materials from one place to another, typically within a production or manufacturing environment.

1. The conveyer efficiently transported the goods from the assembly line to the packaging area.
2. He watched as the conveyer moved steadily, delivering items to the next stage of production.
3. The factory's new conveyer system reduced the time it took to move products significantly.
4. She marveled at how the conveyer could handle such heavy loads with ease and precision.
5. The conveyer belt made a rhythmic sound as it carried the boxes toward their destination.
