

CONVICTISM

Meaning: Convictism refers to the social and psychological conditions and attitudes associated with being a convicted criminal, which can impact rehabilitation and reintegration into society.

1. Convictism can often lead to a cycle of recidivism, making rehabilitation more challenging.
2. The concept of convictism raises important questions about societal reintegration for former inmates.
3. Many argue that the stigma of convictism prevents individuals from rebuilding their lives post-incarceration.
4. In literature, convictism is frequently explored as a theme highlighting the struggles of those with criminal records.
5. Understanding convictism is crucial for developing effective criminal justice policies that promote rehabilitation.
