

CORNEOCALCAREOUS

Meaning: Corneocalcareous refers to a biological structure or organism characterized by a hard, calcareous (calcium carbonate-based) composition that is covered or associated with a keratin-like (horny) layer.

1. The corneocalcareous structure of the organism provided vital insights into its evolutionary adaptations.
2. Researchers discovered a rare corneocalcareous species thriving in the depths of the ocean.
3. The corneocalcareous layer served as a protective shield against predators in marine environments.
4. Understanding the corneocalcareous composition of these organisms could shed light on their resilience to climate change.
5. Scientists documented the growth patterns of corneocalcareous corals in response to varying water temperatures.
