

CORONA

Meaning: Corona refers to the outermost layer of the sun's atmosphere, visible during a solar eclipse, and can also refer to a crown-like structure, such as that seen in the name of the coronavirus, which is characterized by spike proteins resembling a crown.

1. The corona of the sun becomes visible during a total solar eclipse, creating a breathtaking sight.
2. Scientists have been studying the effects of the coronavirus pandemic on mental health across various demographics.
3. The crown-like shape of the coronavirus led to its name, derived from the Latin word for crown, 'corona.'
4. The artist used a vibrant palette to depict the corona of the moon in her latest painting.
5. During the festival, the city was adorned with lights that glimmered like a corona around every streetlamp.
