

CREMATION

Meaning: Cremation is the process of reducing a deceased body to ashes through the use of high heat, often chosen for final arrangements.

1. Cremation has become an increasingly popular choice for families seeking a simpler and more affordable way to handle final arrangements.
2. After the cremation, the ashes were lovingly scattered at her favorite beach, fulfilling her last wish.
3. Many cultures have specific rituals associated with cremation that honor the deceased and comfort the bereaved.
4. The decision for cremation often involves discussions about memorial services and how to celebrate the life of the departed.
5. Some people choose to keep the ashes in an urn, while others prefer to distribute them among loved ones as a way to share their memory.
