

CRENULATION

Meaning: Crenulation refers to a series of notches or indentations, typically along the edges of a structure, that serve both decorative and defensive purposes, especially in architecture.

1. The crenulation along the ancient castle walls provided both beauty and defense against intruders.
2. Artists often incorporate crenulation into their designs to evoke a sense of medieval architecture.
3. The subtle crenulation of the mountain range created a striking silhouette against the sunset.
4. Crenulation is commonly found in the decorative elements of Gothic cathedrals, adding to their grandeur.
5. In biology, the term crenulation can describe the wavy margins of certain leaf shapes.
