

# CRICOID

*Meaning: Cricoid refers to a ring-shaped cartilage located in the larynx that supports the airway and is involved in intubation procedures.*

1. The cricoid cartilage is a crucial structure in the human larynx.
2. In cases of intubation, the cricoid pressure can help prevent regurgitation.
3. Surgeons must be cautious not to damage the cricoid during thyroid operations.
4. The cricoid is the only complete ring of cartilage in the airway.
5. Anatomy students often study the relationships between the cricoid and surrounding structures.
