

CROSS-READING

Meaning: Cross-reading is the practice of comparing and analyzing multiple texts to uncover differing viewpoints or insights on a particular subject.

1. Cross-reading different texts can reveal contrasting perspectives on the same topic.
2. The professor emphasized the importance of cross-reading various sources for a deeper understanding of the material.
3. By cross-reading fiction and non-fiction, the students gained a well-rounded view of the historical context.
4. Cross-reading allowed the researchers to identify discrepancies in the data presented by different authors.
5. In literature classes, cross-reading is often encouraged to enhance critical thinking and analysis skills.
