

CRUPPER

Meaning: A crupper is a strap that passes under a horse's tail and is attached to the saddle or harness to prevent it from sliding forward.

1. The horse's crupper kept the saddle from slipping forward during the ride.
2. She adjusted the crupper on the harness to ensure it fit snugly against the pony's back.
3. In traditional riding gear, the crupper is essential for securing the saddle in place.
4. He explained how a crupper works to newcomers at the equestrian club.
5. Her grandfather often spoke of the importance of a well-fitted crupper for a smooth journey.
6. The horse reared up, and the rider quickly adjusted the crupper to keep the saddle in place.
7. After a long day of riding, she inspected the crupper for any signs of wear or damage.
8. He attached the crupper to the saddle to prevent it from slipping during the steep descent.
9. The crupper was designed to fit snugly around the horse's tail, ensuring stability for the rider.
10. When fitting the saddle, it's important to ensure the crupper is neither too tight nor too loose.
