

CYANOSIS

Meaning: Cyanosis is a bluish discoloration of the skin and mucous membranes resulting from insufficient oxygen in the blood.

1. Cyanosis can often be an early sign of respiratory distress in patients.
2. The doctor noted the patient's cyanosis around the lips and fingers during the examination.
3. In severe cases, cyanosis may indicate a lack of oxygen in the bloodstream.
4. Children with congenital heart defects may exhibit cyanosis as a primary symptom.
5. Prompt medical attention is crucial when cyanosis is observed, as it can signal serious underlying conditions.
