

# DACTYL

*Meaning: Dactyl: a metrical foot in poetry comprising one stressed syllable followed by two unstressed syllables.*

1. A dactyl is a metrical foot consisting of one stressed syllable followed by two unstressed syllables.
2. In poetry, the dactyl can create a lively rhythm that enhances the overall flow of the verse.
3. Many classical poets employed the dactyl to evoke a sense of movement and energy in their work.
4. The word "rhododendron" is an example of a dactyl due to its syllable emphasis pattern.
5. When analyzing meter, identifying the presence of dactyls can reveal deeper layers of meaning in a poem.
