DEAD-RECKONING

Meaning: Dead-reckoning is a navigation method used to estimate one's current position by calculating the distance and direction traveled from a known starting point.

1. Dead-reckoning is a navigation technique that estimates one's current position based on a previously determined location.

2. Sailors often rely on dead-reckoning to chart their course when GPS signals are unavailable.

3. The pilot used dead-reckoning to navigate through the fog, trusting his instincts and calculations.

4. In a survival situation, dead-reckoning can be critical for finding one's way back to safety without modern tools.

5. While not as accurate as GPS, dead-reckoning remains a valuable skill for outdoor adventurers and navigators.
