

DECENTRALIZATION

Meaning: Decentralization is the process of distributing or dispersing functions, powers, people, or decision-making away from a central authority to promote responsiveness and autonomy.

1. Decentralization of power can lead to more responsive and accountable governance.
2. The company's shift towards decentralization allowed individual teams to make quicker decisions.
3. Many argue that decentralization promotes innovation by empowering local leaders.
4. In educational reform, decentralization enables schools to tailor their curricula to better meet community needs.
5. The success of the project hinged on effective decentralization of resources and responsibilities.
