

DECIDUOUS

Meaning: Deciduous refers to trees or plants that shed their leaves annually, typically in response to seasonal changes.

1. The deciduous trees shed their leaves each autumn, creating a beautiful carpet of color on the forest floor.
2. In the temperate climate, many plants are deciduous, adapting to seasonal changes by losing their foliage.
3. The park was filled with deciduous species, offering a stunning display of vibrant reds and yellows during the fall.
4. Deciduous forests are known for their rich biodiversity, providing habitats for a variety of wildlife.
5. During spring, the deciduous trees burst into life, their new leaves unfurling and soaking up the sunlight.
