

DECORTICATION

Meaning: Decortication is a surgical procedure that involves the removal of the outer layer or membrane, often to treat conditions affecting the lungs or pleural space.

1. Decortication is a critical surgical procedure often performed to treat chronic lung diseases.
2. The researchers studied the effects of decortication on patients suffering from pleural effusion.
3. After the decortication, the patient's recovery was closely monitored to ensure no complications arose.
4. Decortication can significantly improve lung function by removing restrictive layers around the lungs.
5. In some cases, decortication may be necessary to relieve severe respiratory distress caused by trapped fluid.
