

DEFECATOR

Meaning: Defecator: a device or organism that expels waste material, particularly in relation to waste management or ecological studies.

1. The defecator was designed to handle waste efficiently in the new eco-friendly building.
2. In the lab, researchers studied the behavior of different species' defecators to understand their impact on soil health.
3. The plumbing system required an upgrade to accommodate the increased volume produced by the defecator.
4. Environmentalists argue that modern defecators should be more sustainable to reduce carbon footprints.
5. Many animals act as natural defecators, helping to fertilize the soil as they move through their habitat.
