

DEFLAGRATING

Meaning: Deflagrating refers to a rapid combustion process that occurs at a speed less than that of sound, producing heat and light, often resulting in a fire.

1. The deflagrating fire quickly consumed the dry brush, leaving nothing but ashes behind.
2. Scientists observed the deflagrating reaction in the lab, marveling at the speed of the combustion.
3. As the fireworks exploded above, the deflagrating shells burst into colorful displays against the night sky.
4. The engineers were cautious while handling the deflagrating material, knowing its potential for danger.
5. Deflagrating gases filled the chamber, causing a loud roar that echoed through the facility.
