

DELINEATOR

Meaning: A delineator is a device, typically a post or marker, used to guide or direct traffic, especially around curves or obstructions on a road.

1. The road delineator helped drivers navigate the sharp curve safely.
2. During the construction project, workers installed new delineators to improve visibility.
3. The bright colors of the delineator made it easy for pedestrians to identify the crosswalk.
4. In poor weather conditions, the delineator served as a crucial guide for lost motorists.
5. Officials decided to replace the old delineators with more reflective models for better safety.
