DEMONSTRABLENESS

Meaning: Demonstrableness refers to the quality of being able to be demonstrated or proven, particularly in scientific and mathematical contexts.

1. The concept of demonstrableness is crucial in scientific research, where hypotheses must be testable.

2. In mathematics, the demonstrableness of a theorem often hinges on its ability to be proven through established principles.

3. Philosophers have debated the demonstrableness of moral truths, questioning whether they can be universally applicable.

4. The demonstrableness of the theory was challenged by new evidence that contradicted previous assumptions.

5. In legal contexts, the demonstrableness of evidence can determine the outcome of a trial significantly.
