

DENTATION

Meaning: Dentation refers to the arrangement or pattern of teeth or serrations, particularly in relation to plant leaves or animal dentition.

1. The dentation of the leaf edges can indicate the plant's species.
2. Researchers studied the dentation patterns of various dinosaur teeth to understand their diets.
3. A close examination of the dentation on the shell revealed important information about its age.
4. In some animals, dentation plays a crucial role in their ability to process food effectively.
5. The artist focused on the dentation of the sculpture, aiming to create a lifelike representation.
