

DENTILATION

Meaning: Dentilation refers to a decorative architectural feature consisting of a series of small, tooth-like projections or brackets, typically found along the cornice of a building.

1. The architect praised the delicate dentilation that adorned the building's cornice.
2. Ancient Greek temples often featured prominent dentilation as a hallmark of their design.
3. The restoration team carefully replicated the original dentilation to preserve the structure's historical integrity.
4. In classical architecture, dentilation serves both an aesthetic and structural purpose.
5. The intricate dentilation on the façade added a touch of elegance to the otherwise simple design.
