

# DEOPIILATION

*Meaning: Deopplilation refers to the process of removing or reducing the population of trees in a forest, often due to logging or deforestation.*

1. The deopplilation of the forest was evident after years of unchecked logging.
2. Scientists are studying the effects of deopplilation on local wildlife and ecosystems.
3. Community leaders are advocating for policies to mitigate the impact of deopplilation in urban areas.
4. In some regions, deopplilation has led to increased soil erosion and loss of biodiversity.
5. The report highlighted the need for sustainable practices to prevent further deopplilation.
