

DEPLANTATION

Meaning: Deplantation is the process of removing or clearing vegetation, particularly trees, from an area, often resulting in environmental degradation.

1. Deplantation is a critical issue in regions where deforestation is rampant.
2. The environmental impact of depplantation can be devastating, leading to habitat loss.
3. After the depplantation process, soil erosion often becomes a significant concern.
4. Researchers are studying the long-term effects of depplantation on local ecosystems.
5. Efforts to combat depplantation include reforestation and sustainable land management practices.
