DEPURATOR

Meaning: Depurator: a device or system that removes impurities or contaminants from a substance, particularly water.

1. The depurator effectively removes contaminants from the water supply.
2. In the laboratory, the depurator was essential for ensuring the purity of the samples.
3. The innovative depurator design allows for greater efficiency in waste management systems.
4. As industries become more eco-conscious, the demand for advanced depurators continues to rise.
5. Technicians regularly service the depurator to maintain optimal performance and reliability.
