

DERMOPTERA

Meaning: Dermoptera is an order of mammals, commonly known as colugos or flying lemurs, characterized by their ability to glide and their distinctive skin flaps.

1. Dermoptera, commonly known as colugos or flying lemurs, are fascinating gliding mammals found in Southeast Asia.
2. The dermoptera exhibit unique adaptations for their gliding lifestyle, including extensive skin flaps that extend from their neck to their fingertips.
3. Researchers are studying the evolutionary relationships between dermoptera and other mammals to better understand their lineage.
4. Despite their name, dermoptera are not lemurs at all; they belong to a separate order of mammals entirely.
5. Conservation efforts are crucial for dermoptera, as habitat loss poses a significant threat to their survival in the wild.
