

DETERMINISM

Meaning: Determinism is the philosophical doctrine that all events, including moral choices, are determined by previously existing causes in accordance with natural laws.

1. Determinism suggests that every event is determined by preceding events in accordance with the natural laws.
2. Many philosophers debate the implications of determinism on free will and moral responsibility.
3. In a deterministic universe, the outcomes of our choices may be preordained by prior causes.
4. The concept of determinism raises questions about fate and the extent of human agency.
5. Some scientists argue that quantum mechanics introduces uncertainty, challenging strict determinism.
