DETURBATION

Meaning: Deturbation refers to the process of restoring order or stability to a chaotic or turbulent system, particularly in the context of fluid dynamics.

1. The scientist's research focused on the deturbation of fluid dynamics in turbulent flows.
2. After the deturbation process, the previously chaotic system exhibited remarkable order.
3. Understanding the deturbation mechanisms is crucial for improving the efficiency of the model.
4. The artist sought to capture the essence of deturbation in his latest abstract painting.
5. In mathematics, deturbation refers to the adjustments made to simplify complex equations.
