

DEWDROP

Meaning: Dewdrop: a small bead of moisture that forms on surfaces, especially plants, during the cooling of the night.

1. The morning sun sparkled on the dewdrop resting on the tip of the leaf.
2. As she walked through the garden, she admired the delicate dewdrops clinging to the petals.
3. A single dewdrop rolled off the grass and splashed onto the soil below.
4. The dewdrops glistened like tiny diamonds, transforming the ordinary landscape into a magical scene.
5. In the early hours, the world was quiet, and the only sound was the gentle drip of dewdrops from the branches.
