

DIAMAGNETICALLY

Meaning: Diamagnetically refers to the behavior of a material that exhibits a weak repulsion to a magnetic field, resulting in a slight opposition to the field's influence.

1. Diamagnetically, the material responded to the applied magnetic field by slightly repelling it.
2. In certain conditions, the particles aligned diamagnetically, leading to unexpected results in the experiment.
3. The scientist explained how the atoms behave diamagnetically when exposed to strong magnetic forces.
4. Diamagnetically levitating objects can be quite mesmerizing to observe in a controlled environment.
5. Understanding how substances interact diamagnetically is crucial for advancements in magnetic technology.
